## Grid® Report for Mechanical Computer-aided Design (MCAD) | Fall 2023

Grid® Report for Mechanical Computer-aided Design (MCAD) | Fall 2023 is based off of scores calculated using the G2 Grid® algorithms from reviews collected by August 15, 2023.

### "Community centered development. Incredible customer service.

Very intuitive UI, no fishing through tons of menus and drop downs to get at the function I need. No saving! The power can go out in the middle of modeling and I never have to worry that anything has been lost."

G2 REVIEWER ★★★★★

### QUALITY OF SUPPORT

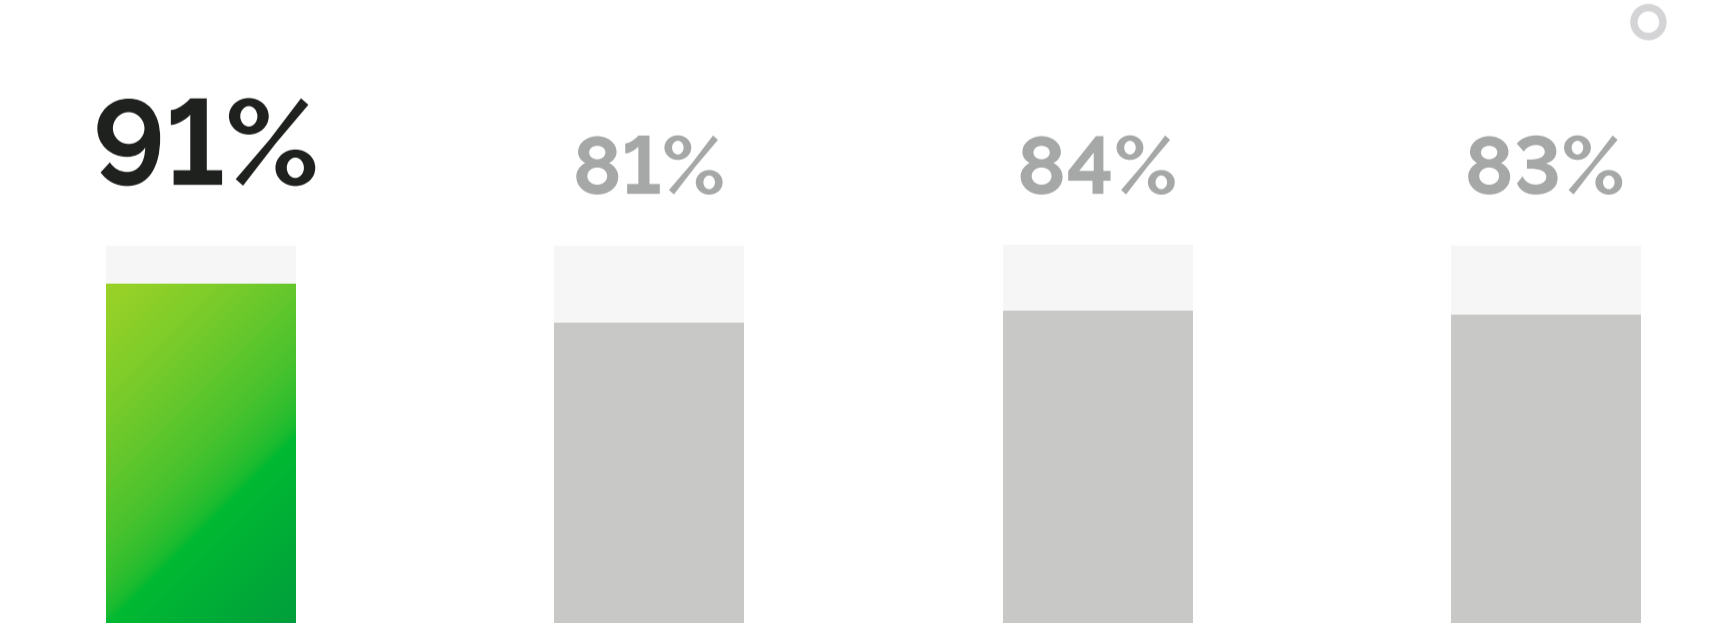

"I have used Solidworks in a professional setting for most of my career. When I was initially introduced to Onshape I was skeptical about a web-based CAD platform, but this ended up being one of the most useful aspects of Onshape.

It has opened the doors to productivity on any computer and saves a ton of time with onboarding new engineers since it doesn't require any software installation or local license management servers."

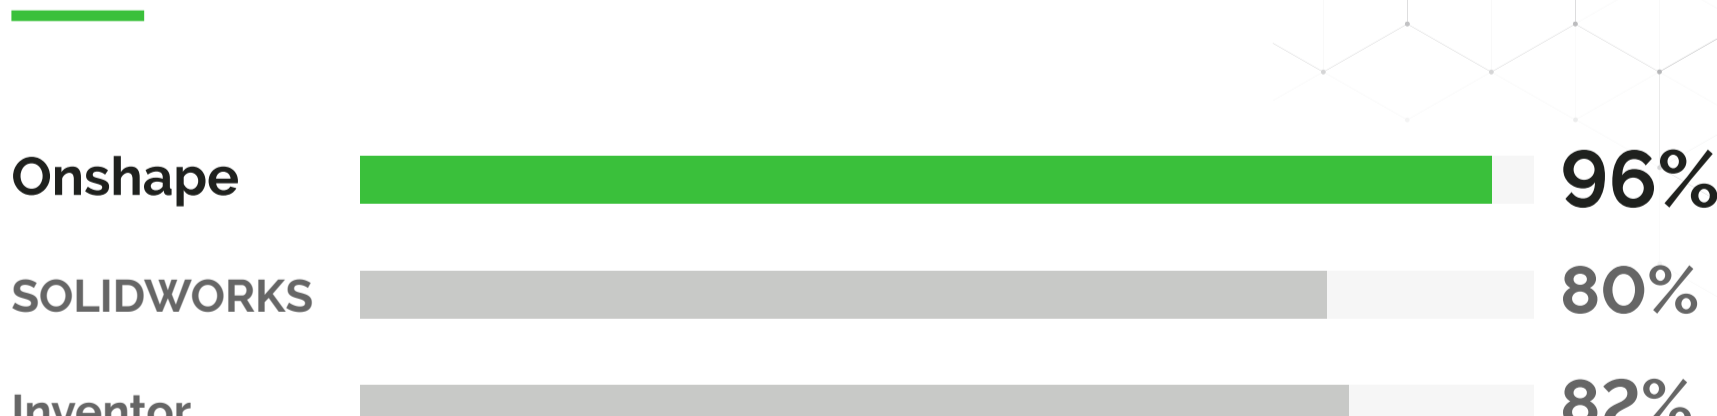

G2 REVIEWER ★★★★★

### HARDWARE SUPPORT (Average of Hardware Support scores based on reviews by G2 users)

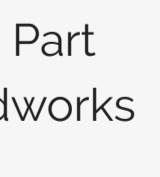

### EASE OF SETUP (Average of Ease of Setup scores based on reviews by G2 users)

"The best feature is the simple fact that it works. Doesn't crash, doesn't runaway-undo your whole tree, doesn't corrupt your saved Part files... That's fairly important for a professional grade software. Solidworks doesn't come close"

G2 REVIEWER ★★★★★
